

## PBMC's Blue Pipe Project to conserve rain water

### Neighbourhood roof tops are connected to Community Wells allowing rainwater to flow into well preventing runoff

#### 9 Community Wells in municipal area completed under the Project

Port Blair, Mar. 12

Port Blair Municipal Council has launched the Blue Pipe Project for urban rainwater harvesting. It is a novel community based rainwater harvesting initiative which utilizes existing building roofs and existing ring wells to recharge ground water. It is to mention that Port Blair witnesses over 2200 mm of rainfall every year but it is also plagued by acute water shortages due to paucity of high quality fresh water sources in the area.

Under this project, the neighbourhood

roof tops are connected to the nearby community wells in the area so that rainwater flows directly into the well instead of the drain. This water recharges the ground water table by slowly seeping into the ground from well. This also allows

the citizens with older buildings to participate in rainwater harvesting.

PBMC's Artists have also painted the well and its surroundings with slogans under Blue Pipe Project to spread awareness on rain water harvesting. Currently, 9

community wells in various places of municipal area have been completed under Blue Pipe Project.

PBMC has also appealed to the citizens of Port Blair to participate in water conservation, rain water harvesting, ensuring cleanliness of wells.

The people of Sistynagar has understood this project and taken it seriously and also participated in water conservation and rain water harvesting by providing Rain Water Harvesting System in Kali Mandir/Temple at Sistynagar.

PBMC has appreciated such participation of public and hopes to see many more people come forward and participate in the project by providing Rain Water Harvesting System in their buildings, a press release from Secretary, Municipal Council said.

## CBSE Class 10 term 1 results announced; releases circular regarding students' performance

New Delhi, Mar. 12
