## PM inaugurates 'Centre-State Science Conclave' in Ahmedabad via video conferencing

### Science is the basis of solutions, evolution and innovation: PM

### Govt. is working with the thinking of Science-Based Development

New Delhi, Sept. 10 (PIB)

The Prime Minister, Shri Narendra Modi inaugurated the 'Centre-State Science Conclave' in Ahmedabad via video conferencing. Addressing the gathering, the Prime Minister highlighted that the organisation of this conclave is a clear example of Sabka Prayas. The Prime Minister remarked "Science is like that energy in the development of 21<sup>st</sup> century India, which has the power to accelerate the development of every region and the development of every State. Today, when India is moving towards leading the fourth industrial revolution, the role of India's science and people related to this field is very important. In such a situation, the responsibility of people in administration and policy making increases significantly."

The Prime Minister emphasized that Science is the basis of solutions, evolution and innovation. And, it is with this inspiration, that today's new India is moving forward with 'Jai Jawan, Jai Kisan, Jai Vigyan as well as Jai Anusandhan'.

Commenting on the lessons that we can learn from history that will help both the Centre and the States, the Prime Minister said, if we remember the early decades of the last century, we find how the world was going through a period of devastation and tragedy. But even in that era, whether it was about the East or the West, scientists everywhere were engaged in their great discovery. In the West,

scientists like Einstein, Fermi, Max Planck, Niels Bohr, and Tesla were dazzling the world with their experiments. In the same period, many scientists including CV Raman, Jagdish Chandra Bose, Satyendranath Bose, Meghnad Saha, and S Chandrasekhara were bringing their new discoveries to the fore. The Prime Minister underlined the difference between the East and West as we were not giving due recognition to the work of our scientists. The Prime Minister pointed out that when we celebrate the achievements of our scientists, science becomes part of our society, it becomes part of the culture. Shri Modi also requested everybody to celebrate the achievements of the scientists of our country. "Scientists",

## Dulari Scheme being implemented effectively in A&N Islands Girl child born on or after 26.01.2013 eligible to get benefit under the scheme 30,453 beneficiaries received financial benefits so far

Staff Reporter

Port Blair, Sept. 10

Dulari Scheme, a Govt. of India scheme, envision encouraging birth of girl child, is being implemented as a plan scheme effectively in A&N Islands. Launched on Jan. 26, 2013 in A&N Islands, the scheme is aimed to reduce the gap in sex ratio to the replacement level of Net Reproduction Rate (NRR) i.e. 1 by ten years after implementation of the scheme whichever is earlier.

The objective of the scheme is to reduce the gap in sex ratio to a replacement level of NRR, to encourage birth of girl child

in A & N Islands, to provide social security to the newly born girl child, for her education and marriage, to adopt delayed marriage practices in respect of girl child and to encourage adoption of hospital delivery practices. A total of 30,453 beneficiaries registered up to

July, 2022 received financial benefits so far.

As per the present scheme, the girl child born on or after 26.01.2013 can avail their benefit under the scheme and the girl child who have passed 8<sup>th</sup> Standard for the academic session of 2012- 2013 onwards will also be eligible from the category of education incentives of this scheme.

All the girl born to either of the parents who is/are having a permanent resident of A & N Islands are eligible for availing benefits provided under Dulari scheme viz. Benefits at Birth (Hospital Delivery or Home

## Accessible India Campaign 'Sugamya Bharat App'- providing universal accessibility & facilitating barrier free environment Citizens urged to download the App & join hands in bringing Sugamyata in all walks of life

Port Blair, Sept. 10

The Accessible India Campaign (AIC) or Sugamya Bharat Abhiyan was launched for creating universal accessibility for Persons with Disabilities (PwDs). The App has been developed by the Department of Empowerment of Persons with Disabilities (DEPwD) under the Ministry of Social Justice and Empowerment. It is a crowd sourcing Mobile Application to enable people with disabilities and even the elderly to register accessibility-related problems. The aim of the app is to sensitize and enhance accessibility in the 3 pillars of the Accessible India Campaign which includes the built

environment, and ICT ecosystem in transportation sector India.

The vision and concept for this mobile app is based on the principle of Jan- Bhagidari in the field of accessibility, so that anyone anytime, anywhere, including its key beneficiaries i.e. the Divyangjan, elderly persons, pregnant women, children and temporarily disabled persons owing to illness, surgery etc. This app is an endeavour and a stepping stone towards achieving universal accessibility and facilitating barriers free environment under the Right of Persons with Disability Act 2016. The Sugamya Bharat App is envisaged not only as a tool to help improve accessibility of the public infrastructure and services across

## India issues guidelines to students who wish to study medicine in China

Beijing, Sept.10

Embassy of India in Beijing said that prospective Indian students who wish to seek admission for undergraduate clinical medicine programme in China are required to obtain a license to practice medicine in China before they appear for the Foreign Medical Graduates Exam (FMGE) in India.

In a clarifying advisory

issued on Friday, the Indian Embassy said that such prospective Indian students are also required to clear the NEET-UG (National Eligibility cum Entrance Test-Under Graduate) exam, which is the entry examination for undergraduate medical education in India, as a prerequisite to pursue medical education abroad.

Only such students -

degree program - can appear in FMGE which is required to pursue clinical medical practice in India. The advisory was issued in response to several queries from prospective Indian students and their parents with respect to seeking admission to undergraduate clinical medicine programme in China. ## PM inaugurates 'Centre-State Science Conclave' in...

(Contd. from page 1)

the Prime Minister said, "are giving ample reasons to the country to celebrate them." He lauded the role of Indian scientists in developing the Corona vaccine and contributing to the world's biggest vaccine drive.

The Prime Minister reiterated that the Government is working with the thinking of Science-Based Development. "Since 2014, there has been a substantial increase in investment in the field of science and technology. Due to the efforts of the Government, today India is ranked 46<sup>th</sup> in the Global Innovation Index, whereas in 2015, India was at number 81", the Prime Minister added. He acknowledged the record number of patents being registered in the country. He also noted the climate of innovation and a vibrant startup ecosystem.

The Prime Minister pointed out that "inclination for science, technology and innovation is in the DNA of our young generation. We need to support this young generation with full strength." The Prime Minister listed new sectors and missions in the field of research and innovation to support the innovative spirit of the youth. He gave examples of Space Mission, National Supercomputing Mission, semiconductor mission, Mission Hydrogen and drone technology. Similarly, NEP is promoting this by providing Science and technology education in the mother tongue.

The Prime Minister highlighted that in order to make India a global centre of research and innovation in this Amrit Kaal, we have to work on many fronts simultaneously. He stressed the need to take science and technology-related research to the local level. He asked States to promote research and innovation as per their local needs. The Prime Minister remarked that innovation can be encouraged by laying emphasis on the creation of more and more scientific institutions and simplification of processes by the State Governments. He further added that the number of innovation labs should also be increased in the institutions of higher education in the States. He also asked every State to lay down modern policy regarding Science, innovation and technology. "As Governments, we have to more and more cooperate and collaborate with our scientists, this will create an atmosphere of a scientific modernity"

The Prime Minister stressed that the States should take full advantage of the ability and expertise of many national-level scientific institutes, and national laboratories that are present. "We also have to take our science-related institutions out of the State of silos for optimum utilisation of scientific institutions and expertise", the Prime Minister added. He asked for science promotion events at the grassroots level. He also advised the State Science Ministers to share good practices and aspects of their science curriculum.

In concluding the address, the Prime Minister expressed the belief that the 'State-Centre Science Conclave' will add a new dimension and resolve toward the progress of Science in the country. The Prime Minister also urged everyone to not let any opportunity slip in the field of science and technology. "The coming 25 years are the most important years for India as it will determine the new identity and strength of India to come", the Prime Minister said. The Prime Minister also urged the participants to take the learnings from this conclave to their States and contribute toward nation-building.

## Girl child born on or after 26.01.2013 eligible...

(Contd. from page 1)

## Vaccination drive in A&N Islands

## 2,66,364 beneficiaries administered precautionary dose of vaccine so far

Port Blair, Sept. 10

The vaccination drive is continuing smoothly in A&N Islands. As per data available, a total of 6,97,339 doses of vaccine have been administered to beneficiaries in the age group of 18 and above so far. Similarly, 23,970 beneficiaries have been vaccinated in the age group of 15 to 18 years. 28, 459 beneficiaries in the age group of 12 to 14 years have been administered both doses of vaccine. The number of beneficiaries administered precautionary dose of vaccine so far stood at 2,66,364.

A total of 1,857 eligible beneficiaries were vaccinated in A&N Islands while the beneficiaries administered precautionary dose of vaccine stood at 1,767 today. In South Andaman

District, 1,799

beneficiaries were vaccinated, out of which, 3 beneficiaries were above 18 years and the number of beneficiaries administered precautionary dose of vaccine stood at 1,730.

In North & Middle Andaman District, 44 beneficiaries were vaccinated, out of which, 1 beneficiary was above

18 years and the number of beneficiaries administered precautionary dose of vaccine stood at 32.

In Nicobar District, 14 beneficiaries were vaccinated and the number of beneficiaries administered precautionary dose of vaccine stood at 5, a press release from DHS said.

## COVID-19 status in A&N Islands

Port Blair, Sept. 10

No COVID positive case has been detected today in A&N Islands. Today, 11 flights with 1875 passengers arrived, out of which, 1734 passengers were vaccinated with both doses while RT-PCR test was conducted on 94 passengers and the reports are awaited.

During RAT conducted on 16 passengers bound

for North & Middle Andaman at Ferrargunj, no positive case has been detected. At Phoenix Bay Jetty, 22 passengers were tested with RAT, no positive case has been detected. RAT was conducted on 24 passengers at Mohanpura Bus Terminus, no positive case has been detected, a press release from Directorate of IP&T said.

## Kashthuri Bhai wins South Andaman District Open Rapid Chess Tournament

Port Blair, Sept. 10

South Andaman District Open Rapid Chess Tournament 2022 was organised by South Andaman District Chess Association (SADCA) in collaboration with PLA Creek Resort Chouldari under the aegis of Andaman Nicobar Chess Association (ANCA) today at PLA Creek Resort, Chouldari, near Veer Savarkar Park. The tournament was inaugurated by Smti. Pramila Kumari, Adhyaksha, Zilla Parishad

, South Andaman by making the ceremonial move on the top board to kick start the event.

Shri Sanjay Kumar Jain, IGP, Law & Order was the chief guest for the closing ceremony while Shri Vishal Jolly, National Executive member, BJP graced occasion as the guest of honour. They gave away the prizes to the winners of the tournament.

Around 100 players participated in the District Level Tournament which was held in rapid mode over six rounds in which R

Kashthuri Bhai was the winner, Yuvan Singh stood second, Anugrah Nair third while V Poursotham & J S Virat bagged the fourth and fifth position respectively in the open category. They were awarded with trophies, cash prize and certificates.

Apart from open category, two best players each in boys and girls from Under-9, Under-11, Under-13 and best youngest players were also awarded with trophies and certificates, a press release from ANCA said.

## 'Sugamya Bharat App'- providing universal...

(Contd. from page 1)

India but also to act as a nudge campaign to sensitize people about the importance of Sugamyata in all walks of life.

Citizens have been requested to download the App from Google Play store and join hand in Jan-Bhagidari and bring Sugamyata in all walks of life, a press release from CRC-A&N Islands said.

## Implementation of PMFBY for Kharif...

(Contd. from page 1)

As per the guidelines of PMFBY, 2% of the sum insured is to be paid by the farmers as insurance premium after availing subsidy under the scheme. However, in the case of Andaman & Nicobar, farmers need to pay only 0.5% of the sum insured while the remaining amount is additionally borne as subsidy by A & N Administration.

PMFBY covers risks of losses arising from either of the possibilities of prevented sowing, sowing to harvesting (due to drought, dry spell, flood, inundation, pest, diseases, landslide, natural fire, lightning, storm, hailstorm, cyclone etc.), post-harvest losses up to two weeks after harvesting. It also compensates the farmers against localized calamities affecting isolated farms in notified area/single peril risk.

Less than expected average yield due to mid-season adversity viz. floods, prolonged dry spells and severe drought etc. is also compensated under PMFBY.

The enrolment under the scheme is voluntary. All farmers including tenant farmers are eligible for coverage. The cutoff date for the enrolment under the scheme for Kharif 2022 has been rescheduled to 15/09/2022. The farmers have to approach the SBI or Co-operative Bank of the concerned areas along with land records and enroll under the scheme.

After enrolment, any losses to the crop arising out of risks covered in the PMFBY need to be mandatorily reported within 24 hours to the Insurance Company (National Insurance Company) directly or through Department of Agriculture and/or Department of Revenue.

For any assistance or queries, farmers may contact the Kisan Call Centre Help Line No.243434/18003451145 or approach the officers/staff of Department of Agriculture of various zones. The farmers of Andaman and Nicobar Islands have been appealed to take maximum benefits of PMFBY, a press release from Directorate of Agriculture said.

## Beach Cleanliness Drive conducted by...

(Contd. from page 1)

collected during the drive from the beach and the same was transported through the Panchayat for safe/proper disposal. The drive was coordinated by Shri Rustam Ali, In-Charge, Radhanagar Beach, Swaraj Dweep, a press release received from Directorate of IP&T said.

## Central Crime Station seizes...

(Contd. from page 1)

been requested to inform about any credible information pertaining to any kind of illegal activity on telephone numbers- 100, 232586, 233307, 9474290250. The identity of the informer will be kept secret, a press release received from SP (CID) said.

Brahmastra - 3D (Hindi U) - 1:10 AM & 4:30 PM		
Captain (Tamil U/A) - 2:20 PM & 8:10 PM		
Sita Ramam (Hindi U) - 4:50 PM		
Enquiries No - 9932089922		
Online Booking - www.ticketnew.com		

# FLYING BOAT- CASSIOPEIA IN THE ISLANDS SKY

By - \*N MOHAN

It was much wonderment to the residents of Port Blair when a flying boat named 'Cassiopeia' made its first landing at Port Blair harbour on 22<sup>nd</sup> December 1941 from Calcutta (now Kolkata) via Akyab (upper Burma) and Rangoon. The flying boat looked like a giant seagull stretching its wings rode on the calm waters of Port Blair Harbour skimming, leaving a trail of white foam and noise.

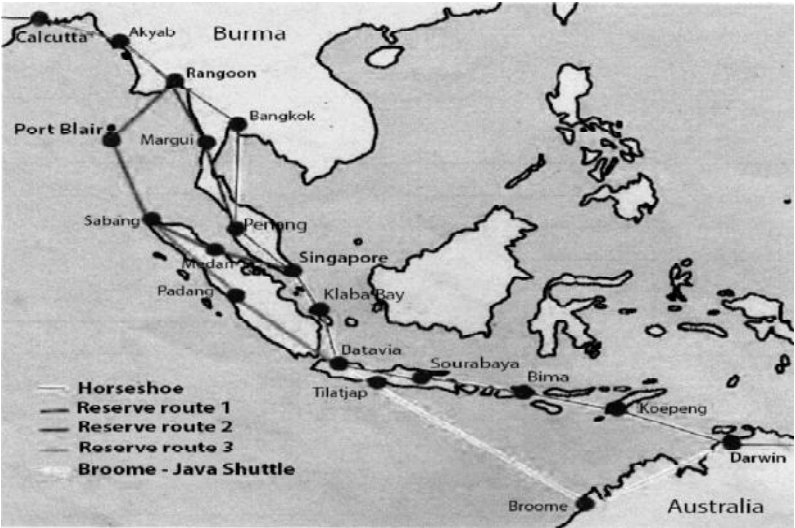

The flying boat Cassiopeia taxied up to a moored motor launch in the harbour where some people alighted with the mails brought in and some boarded the flying boat for onward journey. After refuelling, the flying boat 'Cassiopeia' G-ADUX commanded by Capt. C.E. Madge started her engines, the sound boomed across the water and Cassiopeia lifted her nose, climbed steeply in the sky. Lumbering along at a speed of 160 miles per hour, she headed towards Seletar (north eastern part of Singapore)

via Sabang and Medan (Sumatra). From Singapore further service was connected through flying boats operated by Qantas Empire Airways (Australia).

The Cassiopeia was one of the empire 'C'- class flying boat which were developed for the purpose of the British Govt's Empire Air Mail services from England to Australia and Africa for their Colonial administration. British Govt., who in 1933 had requested aviation manufacturer Short Brothers to design some big new long-range monoplanes which could alight and take off from any reasonably large body of calm water, so were capable of making frequent stops that flying long distance required. Accordingly, some 42 such flying boats were manufactured during 1936-40. All these aircrafts received names starting with the letter 'C'. They were operated jointly by BOAC(British) and Qantas Empire Airways(Australia).The flying boats made it possible to have regular air transport between the areas where there were no airfields for land-based aircraft, and could stop at small island, river, lake or coastal stations to refuel and resupply. The flying boats contained a galley, wine cellar, plenty of space to stroll about and a promenade deck with its high handrail and windows at eye level to gaze at the world of cloud and sky outside the landscape and Ocean below passed serenely by. Cabins could also

be converted into sleeping accommodation at night, in much the same way as in a rail journey. The first ever in-flight service was also available in the flying boats, served by smartly dressed stewards. The flying boats did not operate during the night, so the voyage from England to Australia required nine overnight stops. Passenger stayed at luxury hotels or in accommodation built specially by the airlines. At the time many major cities around the world already possessed water airports, or marine air terminals as they were called in the United States. The flying boats reduced the time taken to travel to Australia from England by air to an unbelievable nine days, significantly faster than a sea journey besides the passengers experiencing a leisurely taste of exotic lands from the comfortable Flying Boats. This was considered aviation's golden age, a time when modernity and luxury combined to define an era in WorldTravel. There were 30 stops between Sydney and London. Travelers in the flying boats experienced as if they are 'sailing in the skies'. Indeed, Short Brothers, the company who built these flying boats claimed- "we don't build aircraft, that float, we build ships that fly". The journey used to start from Southampton (England) via Marseilles (France), Brindisi (Italy), Athens (Greece), Alexandria (Egypt), Karachi (Pakistan)then by land-based aircraft via Jodhpur, Delhi to Calcutta. From Calcutta, the flying boat turned to south across the Bay of Bengal to Akyab (Upper Burma), Rangoon (lower Burma) to Port Blair(Andamans)/Bangkok in Thailand and to Singapore. From Singapore, the crews of Qantas Empire Airways (Australian Airline Company), carried the aircrafts onwards through the East Indies to Darwin in Australia, and around the north of that country to complete the journey at Sydney Harbour. But it was all short lived. With the onset of World War II. For although during the first three years of the war, from1939-1942, the 'Empire' route to London via Singapore remained in operation. In the mean while vulnerability of the vital air route to Japanese aggression was realized, and plans made to gain against it.

Three reserve routes were planned between Calcutta and Darwin(Australia). If the situation worsened, the coast of lower Burma could be avoided by flying from Rangoon to Port Blair or Nancowry in the Andaman Islands in the Bay of Bengal, then via Sabang and Penang to Singapore. If Malaya is captured by the Japanese, it was intended to divert the flying boat from Port Blair and Sabang to Padang in Sumatra, Batavia in Java, and so on to Australia. These were the three phases of what was known as the "Far East Reserve routes" in the event of Japanese aggression.

Since the war was looming in the area with Japanese advancement, the flying boat services disrupted with the fall of Singapore on 15<sup>th</sup> march1942 and thereafter Port Blair was also captured by Japanese force on 23<sup>rd</sup> march1942. The last flying boat to touch Port Blair were on 9<sup>th</sup> and 10<sup>th</sup> Feb.1942.Flying boat commanded by Capt. Gurney made its water landing at Port Blair harbour on 9<sup>th</sup> Feb.'42 and at dawn on10<sup>th</sup> Feb.'42 it departed for Singapore when another flying boat 'Clifton' commanded by Capt. Tapp reached Port Blair from Calcutta via Akyab (upper Burma) and Rangoon (lower Burma). Clifton was refuelled and tried to take off, but had engine power problem. After carrying out minor repair, left Port Blair on 11<sup>th</sup> Feb. for Sibolga(Sumatra), remained overnight at Sibolga and left for Batavia(Java) from where it reached Broome (west coast of Australia). Though a number of Flying boats were destroyed during 2<sup>nd</sup> World War which disrupted the long air connectivity from England to Australia. But their services were later utilized by holiday makers at Southampton (England) for flying to Isles of Scilly and Falmouth. Similarly, at Rose Bay (Australia), flying boats were quite popular amongst the holiday makers to visit Fiji Islands and New Caledonia. However, the growing popularity of advanced aircrafts and rising costs on maintaining aging flying boats, eventually forced the ending of Golden Era of Flying boats but leaving indelible memories of flying boats.

Similar type of Flying boat namely Short Sunderland flying boat which was successfully refurbished is now accessible to the public in Hangar 1 at the Royal Air Force Museum, London. (Retd. Asst. Director of Fisheries)

## Reproductive problems and its management in milch cattle

### Introduction

Reproductive performance is a measure of number of calf per cow per year. As a rule of thumb, a very good cow is a cow which produces one calf in every year. In many places, too often reproduction is at a low level, this can be concluded from the long calving intervals and low conception rates. The common reproductive problems are postpartum anestrus, post pubertal anestrus, silent estrus, anovulation, delayed ovulation, cystic ovarian degeneration, repeat breeding syndrome, under developed genitalia, retention of fetal membrane, postpartum metritis, maceration, mummification, abortion, dystocia, intrauterine infections, endometritis, pyometritis and uterine & vaginal prolapse leads to reproduction failure in dairy cows.

### Etiology

- ✦ Poor genetic makeup, inbreeding and improper herd management
- ✦ Lack of sufficient nutrition and infectious diseases spread by venereal or other routes
- ✦ Improper handling of reproductive tract during artificial insemination or treatment
- ✦ Hormonal imbalance and birth of abnormal calf & dystocia
- ✦ Poisoning by plant or chemicals
- ✦ Season of the year and age of animal
- ✦ Presence of phyto-estrogen in the seashore or hilly region
- ✦ Rolling or fighting of animal in the hilly or undulated region
- ✦ Metabolic diseases, disease of other systems and heavy worm infestation
- ✦ Postpartum disorder
- ✦ Abnormal parturition like cesarean section and fetotomy
- ✦ Improper administration of chemicals or drugs

### Symptoms

- ✦ Animal coming to heat regularly but not conceived: repeat breeding syndrome
- ✦ Animal not at all showing estrus: anestrus
- ✦ Prolapse of vagina, uterus and cervix: hormonal imbalance & nutritional deficiency
- ✦ Hanging of fetal membrane after parturition or abortion: retained fetal membrane
- ✦ Presence of abnormal discharge or pus from the reproductive tract: endometritis and pyometra
- ✦ Presence of compact mass in per rectal examination: mummification
- ✦ In rectal palpation, the animal feels pain and uncomfortable: endometritis, metritis and uterine torsion
- ✦ Presence of reddish grey color discharge and bone fragments:

maceration

- ✦ Temperature, pulse rate and respiration rate are higher than normal
- ✦ Completely lose of the appetite, lack of rumination, looking dull and depressed
- ✦ Animal is showing prolonged estrus: anovulation
- ✦ Tucked up of udder: uterine torsion
- ✦ Prolonged postpartum service interval, higher number of service per conception, prolonged open days, longer calving interval and poor conception rate
- ✦ Edematous uterus and fetal membranes, milk fever, then coma, off feed, standing or sternal recumbence, weakness, depression, dried and hard or fresh uterine mass: uterine prolapse
- ✦ Septicemia in prolonged cases
- ✦ Early abortion (upto 4 months): Trichomoniasis and Vibriosis; late abortion (last trimester): brucellosis or any time: viral infections

### Diagnosis

- ✦ History and clinical signs
- ✦ Complete blood examination
- ✦ White side test: endometritis
- ✦ Antibiotic sentivity test/ culture test of body fluid or discharge from the vagina
- ✦ Rectal examination and vaginal examination
- ✦ Hormonal assay
- ✦ Estimation of metabolites or mineral from blood or body fluids
- ✦ Analysis of plant extract for presence of poison or phyto estrogen
- ✦ Analysis of nutrient deficiency
- ✦ Presence of wide spread abortion or repeat breeding syndrome
- ✦ Presence of symptoms like restless movements, fever, loss of appetite, high pulse rate, heart rate and lack of rumination etc.

### Prognosis

- ✦ Endometritis and metritis and pyometra: good to fair
- ✦ Cystic ovarian degeneration: fair to guarded
- ✦ Uterine and vaginal prolapse: good to fair in immediate case, poor to guarded: delayed cases
- ✦ Mummification: good to fair
- ✦ Maceration: poor to guarded
- ✦ Anestrus and anovulation: good to fair
- ✦ Dystocia, fetotomy, abnormal fetus: depending on the degree of case

### Treatment

- ✦ Proper deworming the animals and balanced nutrition

- ✦ Feed free from the poison, toxin and phyto estrogen
- ✦ Proper heat detection and artificial insemination
- ✦ Proper antibiotic treatment as per the ABST or culture test
- ✦ Anti-inflammatory therapy and supportive therapy like vitamins and minerals
- ✦ In anestrus, cystic ovarian degeneration, anovulation, delayed ovulation and repeat breeding syndrome: synchronization protocols
- ✦ Uterine, vaginal and cervical prolapse: reduce the prolapse and repair accordingly
- ✦ Maceration and mummification: prostaglandin therapy with antibiotic therapy
- ✦ Rectify the hormonal imbalance by proper injection of the necessary hormones
- ✦ Periodical vaccination in the endemic areas
- ✦ Pregnant animal always separated from the non-pregnant animals and bull
- ✦ Cull the genetically suffered and completely sterile animals
- ✦ Take proper precaution when handling the dystocia, fetotomy, retained fetal membrane and abortion
- ✦ Metabolic diseases should be treated as early as possible
- ✦ Uterine torsion case should be treated as quickly as possible

### Control

- ✦ Ensure clean drinking water and protect the animal from any kind of stress
- ✦ Pregnant animals should not be allowed to mix other animals especially aborted or suffered any disease like brucellosis
- ✦ Animals should be kept away from slippery floor during advance pregnancy.
- ✦ Pregnant animals should be separated from other animals at least 1-2 weeks before the expected date of delivery
- ✦ Observe for signs of delivery: External genitalia swelling, udder swelling, restlessness and animals stand up and lie down frequently. Majority of the cows deliver without any help; in case, any calving difficulties, seek help of the veterinarian.
- ✦ External genitalia and flank should be cleaned after parturition and cow should be provided warm drinking water. The animal needs to be protected from chill especially during winter season.
- ✦ Normally placenta will be expelled within 2 to 6 hours of calving. If it is retained even after 8 hr of calving, take the help of a veterinarian.
- ✦ Placenta, mucus and uterine secretion should be cleaned thoroughly from the calf's body and nose and the naval cord should be severed with a sterile knife followed by applicator of the iodine solution.

OFFICE OF THE DEPUTY COMMISSIONER  
EXCISE DEPARTMENT  
Port Blair

Application No. 2022103012120750

Dated: 19-Aug-2022

**NOTICE**

It is brought to the notice of the general public that Mr. SANJEET LAL, Son of Mr. SANJAY LAL, R/o has applied for the grant of Bar License for HOTEL PALM SHORE, Dhanikhari, Ferrargunj, South Andaman, ANDAMAN AND NICOBAR ISLANDS-744103

In this regard, if any person has any objection to this, he / she may file objection in writing the objection using the URL <https://edistrict.andaman.gov.in/PublicObjection/> NewBarLicense alongwith the proofs within 15 days of the issue of this notice.

Objection received after the stipulated period will not be entertained.

Only those objections which attract provisions contained in the Excise Regulations, Rules, Policy and Guidelines will be examined.

Assistant Commissioner (Excise)

**Note:** This Certificate is computer generated and does not require any seal / signature in original.

Your objection can be raised for this notice by

(a) Keying in the application number 2022103012120750 in the URL <https://edistrict.andaman.gov.in/PublicObjection/> NewBarLicense

(or)

(b) Reading the QR Code with Mobile QR Code reader and verify through online.

**AFFIDAVIT**

I, ABDUL GAFFOR, S/o C. ABDULLA, R/o House No. 109, Ali Pur, Mathura Village, under Ferrargunj Tehsil in South Andaman District, A & N Islands, do hereby solemnly affirm and declare as under:

- That I am a permanent resident of these Islands and residing at above mentioned address.
- That I am a Central Govt. Servant working under Assam Rifles.
- That my actual and correct name is ABDUL GAFFOR as recorded in my School Certificate and other record, which are available with me.
- That earlier my name entered in my Aadhaar Card No. 2741 5963 8560 as C. ABDUL GAFFOR and accordingly my name entered in my Service Records as C. ABDUL GAFFOR.
- That now, I have corrected my name in my Aadhaar Card as ABDUL GAFFOR and obtained fresh Aadhaar Card with my correct name.
- That the abovesaid name C. ABDUL GAFFOR and ABDUL GAFFOR are one and the same identical.
- That I swear this affidavit for the purpose to declare my actual and correct name and to correction my name in my service records, henceforth my name shall be treated as ABDUL GAFFOR for official and non-official purpose.
- That the above statement made by me is true and correct to the best of my knowledge and belief.
