Katchal Tall - A promising coconut cultivar

It is a popular coconut cultivar of Car Nicobar Island. The palms are morphologically similar to Andaman Ordinary Tall but with differences in nut characteristics. An accession collected and evaluated at World Coconut Germplasm Centre, ICAR-CIARI, Port Blair has shown that the palms of this cultivar are robust, high yielding with higher copra content. The palms of this variety take about 5-7 years for first flowering. The kernel is thick and recorded higher milk recovery under VCO production process. The fruits are green, husk thickness is thin (2.5 cm), dehusked fruits are oblong, good tender nut water quantity (706 ml per fruit), average fruit weight over 1814.25g with average copra content of about 217.75g. The oil content is about 64%. Under the natural habitat of rainfed conditions in Car Nicobar, the palms exhibited large bole, stout stem, good fruit setting with estimated fruit yield of over 140 nuts per palm per year, regular production of bunches and dense crown. There are no major pests recorded in this population. Careful mother palm selection followed by seedling selection is important to establish good plantation of Katcal Tall considering the variability observed in the natural and conserved population.

Benefit: The cultivar has good tender nut water quantity (706 ml per fruit) hence used for tender coconut purpose, copra making, processed coconut kernel products and VCO production.

Emma Raducanu to clash with Leylah Fernandez in finals on Sunday

New York, Sept. 10
British teenager Emma Raducanu made history by becoming the first ever qualifier to reach the women's singles final at a Grand Slam. The British teen defeated 17th seeded Maria Sakkari of Greece 6-1, 6-4 in the semi-finals of US Open Tennis today to become the youngest Grand Slam finalist in 17 years. Eighteen year old Raducanu, who is

ranked 150th in the world, will take on another teen Leylah Fernandez, 19, of Canada in the women's singles US Open final on Sunday. Leylah

Fernandez defeated A Sabalenka in the semi-finals. A 17-year-old Maria Sharapova had won the Wimbledon title in 2004.

Co-WIN develops new API 'Know Your Customer's or Client's Vaccination Status'

New Delhi, Sept. 10
Co-WIN has developed a new Application Programming Interface called 'Know Your Customer's or Client's Vaccination Status - KYC-VS. This will enable entities to check an individual's status of vaccination through CoWIN. To use this API, an individual needs to enter his or her mobile number and name. Thereafter, they will get an OTP which they have to enter. In return, Co-

WIN will send a response to the individual's status of vaccination. If the response of Co-WIN -0 means Person is not vaccinated, 1 - Person is partially vaccinated and 2 - Person is fully vaccinated. This response will be digitally signed and can be shared instantly with the verifying entity. Union Health Ministry said, over 72 crore vaccine doses have been administered since the vaccination campaign against COVID-19 was flagged off on 16th January 16 this year. To provide a proof of vaccination for each of these individuals, Co-WIN is already issuing a digitally verifiable certificate. This certificate can be saved on a digital device or stored in Digi Locker from where it can be digitally shared as and when required as a proof of vaccination. (Source:india.gov.in)
