SPECIAL BULLETIN NO. -2

Sub: Enhanced rainfall activity over Andaman & Nicobar islands from 04th -08th May.2022.

A cyclonic circulation is likely to form over South Andaman Sea and neighborhood around 04th May,2022. Under its influence, a Low Pressure Area is likely to form over the same region during next 24 hours. It is likely become more marked during subsequent 24 hours and enhanced rainfall activity along with gusty wind is likely to occur over Andaman & Nicobar Islands during $04^{th} - 08^{th}$ May, 2022.

1. Forecast: Rain or thundershowers very likely to occur at most places during 04th to 08th May,2022 over Andaman & Nicobar Islands.

2. Heavy rainfall Warning:

04.05.2022: Heavy rainfall (7-11 cm) very likely to occur at one or two places over Nicobar islands.

05.05.2022: Heavy rainfall (7-11 cm) very likely to occur at one or two places over Andaman & Nicobar islands.

06.05.2022 & 07.05.2022: Heavy to very heavy rainfall (7-20 cm) very likely to occur at one or two places over Andaman & Nicobar islands.

08.05.2022: Heavy rainfall (7-11 cm) very likely to occur at one or two places over Andaman islands.

3. Wind Warning: :

04.05.2022: Wind speed of 30-40 kmph likely to experience over Andaman & Nicobar islands.

05.05.2022: Wind speed of 40-50 kmph likely to experience over Andaman & Nicobar islands.

06.05.2022 & 07.05.2022: Wind speed of 50-60 kmph very likely to experience over Andaman & Nicobar islands.

08.05.2022: Wind speed of 40-50 kmph likely to experience over Andaman & Nicobar islands.

4. Fishermen Warning: (RED WARNING)

In anticipation of formation of Low Pressure Area over South Andaman Sea & neighborhood and likely intensification of the system, squally weather with wind speed exceeding 45 kmph very likely over Andaman Sea & neighborhood. Fishermen are advised not to venture into the sea from 04th May, 2022. Those who are in deep sea are advised to return to the coast by today night.
